B. Use of Estimates in the Preparation of the Financial Statements

The preparation of financial statements in conformity with Statutory Accounting Principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities. It also requires disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenue and expenses during the period. Actual results could differ from those estimates.

C. Accounting Policy

Life premiums are recognized as income over the premium paying period of the related policies. Annuity considerations are recognized as income when received. Deposits on deposit-type contracts are entered directly as a liability when received. Treaties that do not meet the definition of risk transfer are recorded under the rules of deposit accounting as prescribed in Statement of Statutory Accounting Principles ("SSAP") No. 61 R – *Life, Deposit-Type and Accident and Health Reinsurance*. Health premiums are earned ratably over the terms of the related insurance and reinsurance contracts or policies. Expenses incurred in connection with acquiring new insurance business, including acquisition costs such as sales commissions, are charged to operations as incurred.

In addition, the Company uses the following accounting policies:

- (1) Short-term investments that have original maturities of greater than three months and less than twelve months at date of purchase are carried at amortized cost, which approximates fair value.
- (2) Bonds not backed by other loans are stated at amortized cost or fair value, using the modified scientific method, in accordance with the NAIC Purposes and Procedures Manual of the Capital Markets and Investment Analysis Office. The Company does not hold SVO - designated securities which would be valued using a systematic value measurement method.
- (3) Common stocks are carried at fair value, except for controlled subsidiaries and affiliates which are carried on the equity basis.
- (4) Preferred stocks are stated at cost or amortized cost except those rated NAIC class 4 or lower quality, which are carried at the lower of cost or fair value.

2. Accounting Changes and Corrections of Errors

Accounting Changes

Principles Based Bond Definition Project

Effective January 2025, the NAIC Statutory Accounting Principles Working Group adopted reporting changes under the Principles Based Bond Definition project. The reporting changes required review of the Company's bond portfolio to determine whether or not each security meets the new principles-based definition of a bond under SSAP 26. The review of the bond portfolio included evaluation of the economic substance of each security relative to the revised guidance in SSAP 26 Bonds, SSAP 43 Asset-Backed & Structured Securities, and SSAP 21 Other Admitted Assets. The impact of these changes is outlined in Note 21 C of this statement.

Net Negative IMR

In August 2023, the NAIC Statutory Accounting Principles Working Group adopted changes that allow companies to admit net negative interest maintenance reserves (IMR) with certain criteria. A company with at least 300% ACL RBC, shall admit net negative IMR as an asset across both general and separate accounts in the amount up to 10% of adjusted capital and surplus of the general account. In addition, an amount equal to the admitted net negative IMR must be included in special surplus from unassigned surplus. A company that admits net negative IMR must include accompanying disclosures. The accounting changes are effective through December 31, 2026 and are nullified as of January 1, 2027.

The Company had \$85,788,984 gross negative IMR, of which \$85,788,984 of net negative IMR was presented as an admitted asset in the general account as of December 31, 2025. There was no negative IMR amount recorded related to insulated or non-insulated separate accounts.

The adjusted surplus amount used to calculate the 10% limit was \$6,097,130,202 based on reported surplus as of September 30, 2025, adjusted as prescribed for certain balances.

The Company attests that:

- a. Fixed income investments generating IMR losses comply with the reporting entity's investment and liability management policies.
- b. IMR losses for fixed income related derivatives are all in accordance with prudent and documented risk management procedures, in accordance with a reporting entity's derivative use plans and reflect symmetry with historical treatment in which unrealized derivative gains were reversed to IMR and amortized in lieu of being recognized as realized gains upon derivative termination.
- c. Any deviation to (a) was either because of temporary and transitory timing issue or related to a specific event, such as a reinsurance transaction, that mechanically made the cause of IMR losses not reflective of reinvestment activities.
- d. Asset sales that were generating admitted negative IMR were not completed by liquidity pressures (e.g., to fund significant cash outflows including, but not limited to excess withdrawals and collateral calls).

Correction of Errors

During 2024, corrections were made to 2022 and 2021 balances resulting in an increase in insurance taxes, licenses and fees of \$1,032,254 and \$12,553 respectively. As a result of this correction \$403,607 of state income tax receivables were written off. In accordance with SSAP No. 3 - Accounting Changes and Correction of Errors, these changes are being treated as a correction of an error and presented as an adjustment to unassigned surplus of \$1,448,414 for the period ended December 31, 2024.

During 2024, corrections were made to 2023 balances resulting in a \$14,312,596 increase in Net realized capital gains (losses). In accordance with SSAP No. 3 - Accounting Changes and Correction of Errors, these changes are being treated as a correction of an error and presented as an adjustment to unassigned surplus of \$14,312,596 for the period ended September 30, 2024.

8. Derivative Instruments

- A. Derivatives under SSAP No. 86 - Derivatives
 - (1) The Company's derivative instruments are primarily used to hedge a wide range of risks including interest rate risk, equity market risk and foreign exchange risk. The Company receives collateral from its derivative counterparties to limit credit risk.
 - (2) The Company manages its equity market risk by entering into certain OTC derivatives, primarily equity options and swaps, as well as exchange traded equity options and futures. The Company trades exchange-traded fixed income future contracts, OTC swaps and swaptions to protect against interest rate risk. The Company entered into currency forwards and cross currency swaps to limit its currency exposure from foreign currency denominated assets. The total net carrying value of derivative assets, net of derivative liabilities, was \$480,377,156 and \$464,808,375 as of December 31, 2025 and December 31, 2024, respectively.
 - (3) Under SSAP No. 86, Derivatives, the Company has elected to account for its derivatives using the fair value method of accounting, with changes in fair value recorded as unrealized investment gains or losses. The realized gains or losses are recorded upon the derivative contract expiry. The Company entered into interest rate swaps hedging Federal Home Loan Bank liabilities which employs hedge accounting. In addition, the Company has designated cash flow hedge interest rate swaps to hedge the interest rate risk associated with floating rate investments and fair value hedge cross curency swaps to hedge the foreign currency risk associated with foreign currency-denominated bonds. The derivatives that hedge those assets and liabilities are valued in a manner consistent with the underlying hedged item, which are carried at amortized cost.
 - (4) Derivative contracts with financing premiums - Not Applicable
 - (5) Net gain or loss recognized - Not Applicable
 - (6) Net gain or loss recognized from derivatives no longer qualifying for hedge accounting - Not Applicable
 - (7) Net investment income and realized gains and losses related to derivatives are reported within the investing section of the statement of cash flows.
 - (8) The Company has designated bond forwards to hedge the interest rate risk associated with the planned purchase of AFS debt securities in a cash flow hedge. Regression analysis is used to assess the effectiveness of this hedge. For the period ended December 31, 2025, the bond forwards were recorded at cost. Following the qualifying purchases of AFS securities, the fair value of the portion of the bond forward associated with each purchase will be adjusted to the AFS book values, and accretion or amortization will be recognized over the life of the securities using the effective interest method. This arrangement is hedging purchases through January 2036 and is expected to affect earnings until 2056. There was \$437,000,000 of AFS securities purchased through December 31, 2025, and the fair value (\$62,813,366) of the hedge associated with each purchase was adjusted to the AFS security book values.

The ultimate realization of deferred tax assets depends on the generation of future taxable income during the periods in which the temporary differences are deductible and prior to the expiration of capital loss, net operating loss, and tax credit carry-forwards. Management considers the scheduled reversal of deferred tax liabilities (including the impact of available carry-back and carry-forward periods), projected taxable income, and tax planning strategies in making this assessment. Management believes it is more likely than not that all deferred tax assets will be realized based on projected taxable income and available tax planning strategies.

A. Nature of Relationships

The Company is organized as a stock life insurance company, and is a wholly-owned subsidiary of Global Atlantic (Fin) Company ("Finco"), which is a wholly owned indirect subsidiary of The Global Atlantic Financial Group LLC ("TGAFGL"), a Bermuda company.

The Company directly owns all of the outstanding shares of Accordia Life and Annuity Company ("Accordia"), an Iowa domiciled company, and First Allmerica Financial Life Insurance Company ("FAFLIC"), a Massachusetts domiciled company, and Forethought Life Insurance Company ("FLIC"), an Indiana domiciled insurance company.

14. Liabilities, Contingencies and Assessments (Continued)

F. All Other Contingencies

The Company is involved from time to time in judicial, regulatory and arbitration proceedings concerning matters arising in connection with the conduct of its business. THG has agreed to indemnify the Company and Goldman Sachs with respect to certain of these matters as provided in the agreement through which the Company initially acquired business from The Hanover Group ("THG"). Management believes, based on currently available information, that the results of such proceedings, in the aggregate, will not have a material adverse effect on the Company's financial condition. Given the inherent difficulty of predicting the outcome of the Company's litigation and regulatory matters, particularly in cases or proceeding in which substantial or indeterminate damages or fines are sought, the Company cannot estimate losses, or ranges of losses, for cases or proceedings where there is only a reasonable possibility that a loss may be incurred. However, the Company believes that at the present time there are no pending or threatened lawsuits that are reasonably likely to have a material adverse effect on the Company's consolidated financial position.

In addition, the Company is involved, from time to time, in investigations and proceedings by governmental and self-regulatory agencies, which may include investigations into such matters as "market timing" in sub-accounts of variable annuity and life products, revenue sharing and other matters, claims payment practices, and unclaimed property escheatment practices. A number of companies have announced settlements of enforcement actions related to such matters with various regulatory agencies, including the SEC, which has included a range of monetary penalties and restitution. The Company is not currently involved in any such investigations or proceedings, though there can be no assurance that such investigations or proceedings may not arise in the future.

In connection with a cybersecurity incident on May 29, 2023, related to services provided to several companies by Pension Benefits Information LLC, and its use of MOVEit software ("PBI/MOVEit Incident"), The Global Atlantic Financial Group LLC or some of its affiliates have received a total of five putative class action complaints alleging failure to properly secure and safeguard customers' sensitive information. Four cases originated in United States District Court for the Southern District of New York: Clancy, Michael v. The Global Atlantic Financial Group LLC (1:23-cv-07975) filed September 8, 2023, Guzman, Marcelina v. The Global Atlantic Financial Group LLC (1:23-cv-08150) filed September 14, 2023, and Hendrix, Eudoice v. Global Atlantic Financial Company, Accordia Life and Annuity Company, Commonwealth Annuity and Life Insurance Company, First Allmerica Financial Life Insurance Company and Forethought Life Insurance Company (1:23-cv-08058) filed September 12, 2023, and Bernstein, Michael v. The Global Atlantic Financial Group LLC (1:23-cv-9868) filed in New York state court September 15, 2023. A fifth case was filed in the United States District Court for the Southern District of Indiana, but subsequently was voluntarily dismissed: Hansa v. Forethought Life Insurance Company, Global Atlantic Insurance Network LLC, and The Global Atlantic Financial Group LLC (1:23-cv-01549) filed August 28, 2023. The Company itself is currently a party only in the Hendrix case. A judicial panel consolidated certain PBI/MOVEit Incident-related litigation in an MDL and transferred the cases to the District of Massachusetts. This order applies to all matters against The Global Atlantic Financial Group LLC and its affiliates.

The Company's subsidiaries, FAFLIC and Accordia, entered into a process of converting over 500,000 in-force life insurance policies from systems managed by Athene Holdings Limited, or "Athene," to the platform of one of our third party service providers, DXC, or the "Conversion," the Company expects to incur a variety of litigation and regulatory costs. The Company has received formal and informal inquiries from state regulators concerning the administration of policies, policyholder complaints and possible violations of state insurance or consumer protection laws, which have resulted in and may result in additional fines, monetary settlements or proceedings. For example, on June 13, 2018, Accordia received notice of a regulatory matter from the California Department of Insurance regarding administration issues relating to certain California life insurance policies reinsured by Accordia which are administered by DXC. On August 19, 2020, Accordia and the California Department of Insurance resolved the dispute, whereby Accordia paid a \$11.5 million fine and agreed to perform certain corrective actions for California policyholders impacted by conversion.

There were no transfers between Levels 1 and 2 during the current year.

(4) Fair value inputs Level 2 and Level 3

Bonds

In accordance with the NAIC Purposes and Procedures Manual of the NAIC Investment Analysis Office, bonds rated 6 are carried at the lower of amortized cost or fair value. As of December 31, 2025 the Company had 3 6 rated bonds with a carrying value of \$19,607,076. As of December 31, 2024 the Company had 7 6 rated bonds with a carrying value of \$32,211,902.

Separate Account Assets

The estimated fair value of assets held in separate accounts is based on quoted market prices. Separate account assets representing contract holder funds are measured at fair value and reported as a summary total in the Statement of Assets, with an equivalent summary total reported for related liabilities. The market value adjusted annuity is comprised of bonds, in which the fair value is based on external vendor prices. Based on the level of observable activity, these bonds will be measured at either Level 1 or Level 2.

Derivatives

The Company enters into certain OTC derivatives; primarily equity put options and interest rate swaps, and exchange-traded equity and interest rate futures contracts with three-month termination periods. The Company transacts in these derivatives primarily to hedge risk on its life and annuity business. As described in Note 8, the variable annuity business has been 100% ceded via modified coinsurance or funds withheld coinsurance to affiliates since December 31, 2009 and the effect of the derivatives that hedge this business is passed to the reinsurer. The Company transacts in derivatives to manage the interest rate and credit risk related to the general account portfolio. In addition, the Company trades credit derivatives to hedge counterparty risk on reinsurance transactions.

OTC derivatives are valued using market transactions and other market evidence whenever possible, including market-based inputs to models, model calibration to market clearing transactions, broker or dealer quotations, or alternative pricing sources with reasonable levels of price transparency. Where models are used, the selection of a particular model to value an OTC derivative depends upon the contractual terms of, and specific risks inherent in, the instrument as well as the availability of pricing information in the market. Valuation models require a variety of inputs, including contractual terms, market prices, yield curves, credit curves, measures of volatility, prepayment rates and correlations of such inputs. For OTC derivatives that trade in liquid markets, such as generic forwards, swaps and options, model inputs can generally be verified and model selection does not involve significant management judgment. Such instruments are typically classified within Level 2 of the fair value hierarchy.

Notes to the Financial Statements

20. Fair Value Measurements (Continued)

Overall, transfers into and/or out of Level 3 are attributable to a change in the observability of inputs. Assets and liabilities are transferred into Level 3 when a significant input cannot be corroborated with market observable data. This occurs when market activity decreases significantly and underlying inputs cannot be observed, current prices are not available, and/or when there are significant variances in quoted prices, thereby affecting transparency. Assets and liabilities are transferred out of Level 3 when circumstances change such that a significant input can be corroborated with market observable data. This may be due to a significant increase in market activity, a specific event, or one or more significant input(s) becoming observable. Transfers into and/or out of any level are assumed to occur at the beginning of the period.

35. Separate Accounts

A. Separate Account Activity

- (1) For the current reporting year, Commonwealth Annuity reported assets and liabilities from the following product lines into separate accounts:
- Individual Variable Annuities
 - Individual and Group Variable Life Insurance Products
 - Pension Risk Transfer

In accordance with the procedures of Massachusetts, the Company's domiciliary state for approving items within a separate account, the separate account classification for variable life insurance products, variable annuity contracts and pension risk transfer products are supported by 175 M.G.L. Sections 132G – 132I.

Variable Separate Accounts and Guaranteed Period Accounts.

The Company's individual variable annuities, individual and group variable life insurance policies, are supported by variable separate accounts of a nonguaranteed return nature. These separate accounts are comprised of sub-accounts, each of which invest in an investment company that is registered under the Investment Company Act of 1940. The net investment experience of a sub-account is credited directly to the policy owner or certificate owner, and can be positive or negative. The assets and liabilities of the sub-accounts are carried at market.

In addition to variable separate accounts, certain variable annuity contracts also offer guarantee period accounts (a "GPA"), which provides for the accumulation of interest at a guaranteed interest rate for a stated period (the "Guarantee Period"). Assets in a GPA are invested by the Company in accordance with the investment restrictions applicable to the General Account. If the investment proceeds of a GPA at the end of the guarantee period are insufficient to cover its stated rate of return, the difference will be remitted by the General account. Transfers or withdrawals from a GPA on any date other than on the day following the expiration of the GPA's Guarantee Period is subject to a market value adjustment, which may be positive or negative; however, in no event will the guaranteed interest rate be less than 3%. If the investment proceeds of a Guarantee Period Account at the end of the guarantee period are insufficient to cover principal and this minimum rate of return, the difference will be remitted by the General Account.

Variable Product Guarantees.

The Company's variable annuity products provide certain optional riders that a policy owner could elect at issue for a separate charge. The availability of these riders varies by product, but include certain enhanced death benefit riders, a minimum enhanced earning rider, a minimum guaranteed annuity payment benefit rider and a guarantee lifetime withdrawal rider. Under some products, a separate charge for a rider is made against the annuity contract's accumulated value. Under other products, the rider charge is assessed against separate account assets. If proceeds from the investment options are insufficient to provide the guaranteed benefits, any difference will be funded by the Company's General Account. The reserves for these riders are set forth in Exhibit 5, Miscellaneous Reserves Section G of the Company's general account Annual Statement.

Notes to the Financial Statements

35. Separate Accounts (Continued)

The Company currently issues variable annuity products that offer an enhanced death benefit rider for which the charge is assessed as a daily charge against separate account assets. In addition, these products offer a guaranteed lifetime withdrawal rider, for which the charge is made through reductions of a variable annuity contract's accumulations units in the sub-accounts. In each case, if proceeds from the separate account are insufficient to provide the guaranteed benefits, any difference will be funded by the Company's General Account. The reserves for these riders are set forth in Exhibit 5, Miscellaneous Reserves Section G, of the Company's general account annual statement.

Pension Risk Transfer

The Company entered into the market as a fully direct insurer issuing group annuity contracts. The company hired third party administrators to administer the business in respect of all annuitants. Each Group Annuity Contract (GAC) will be administered by a single administrator and assets received will be held in a comingled separate account on the company's balance sheet. The separate account assets are then ceded to a an affiliated party.

(2) Separate account assets legally insulated from the general account claims

In accordance with the products/transactions recorded within the separate account, some assets are considered legally insulated whereas others are not legally insulated from the general account. The legal insulation of the separate account assets prevents such assets from being generally available to satisfy claims resulting from the general account.

Pursuant to Section 175 M.G.L. 132G, that portion of the assets of the separate accounts equal to the reserves and other contract liabilities with respect to the respective separate account are not to be chargeable with liabilities arising out of any other business the Company may conduct.

The Company's separate account statement includes legally insulated assets of \$2,857,669,653 and \$2,176,041,685 as of December 31 2025 and 2024, respectively. The assets legally insulated from the general account as of December 31, 2024 are attributed to the following products/transactions:

The Company does not engage in securities lending transactions within any separate account.

(5) Asset transfers that did not reflect sales in exchange for cash between the general account and the separate account - Not Applicable

B. General Nature and Characteristics of Separate Accounts Business

Most separate accounts held by the Company relate to individual variable annuities or individual life insurance of a non-guaranteed return nature. The net investment return of the separate account is credited directly to the policyholder and can be positive or negative. The variable annuities provide a minimum guaranteed death benefit, the nature of which has varied over time. In 1996, the Company began offering a minimum guaranteed death benefit that is adjusted annually to the current account value. The assets and liabilities of these accounts are carried at market, and the business has been included in column 4 of the table below.

In 1996, the Company began offering annuities with market value adjustments. While there are guarantees associated with these annuities, returns above this guaranteed level may be subject to market value adjustments which can be positive or negative. The assets and liabilities of these annuities are carried at market, and the business has been included in column 2 below.

Information regarding the separate accounts of the Company is as follows:
