B. Use of Estimates in the Preparation of the Financial Statements

The preparation of financial statements in conformity with Statutory Accounting Principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities. It also requires disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenue and expenses during the period. Actual results could differ from those estimates.

C. Accounting Policy

Life premiums are recognized as income over the premium paying period of the related policies. Annuity considerations are recognized as income when received. Deposits on deposit-type contracts are entered directly as a liability when received. Treaties that do not meet the definition of risk transfer are recorded under the rules of deposit accounting as prescribed in Statement of Statutory Accounting Principles (SSAP) No. 61R – *Life, Deposit-Type and Accident and Health Reinsurance*. Expenses incurred in connection with acquiring new insurance business, including acquisition costs such as sales commissions, are charged to operations as incurred. The amount of dividends to be paid to policyholders is determined annually by the Company's Board of Directors. The aggregate amount of policyholder dividends is set such that anticipated revenue from the Closed Block is expected to be sufficient to support future payments for claims, certain expenses and taxes and to provide for the continuation of the dividend scales set in that year. In addition, the Company uses the following accounting policies:

- (1) Short-term investments that have original maturities of greater than three months and less than twelve months at date of purchase are carried at amortized cost, which approximates fair value.
- (2) Bonds not backed by other loans are stated at amortized cost or fair value, using the modified scientific method, in accordance with the NAIC Purposes and Procedures Manual of the Capital Markets and Investment Analysis Office. The Company does not hold SVO - designated securities which would be valued using a systematic value measurement method.
- (3) Common stocks are carried at fair value, except investments in stocks of uncombined subsidiaries and affiliates in which the Company has an interest of 10% or more are carried on the equity basis.
- (4) The Company does not have any preferred stocks.
- (5) Mortgage loans are stated at amortized cost or fair value, in accordance with the NAIC Purposes and Procedures Manual of the Capital Markets and Investment Analysis Office.
- (6) Asset-backed securities are stated at amortized cost using the interest method including anticipated prepayments at the date of purchase in accordance with SSAP No. 43 - *Asset-backed Securities*. Changes in prepayment speeds and estimated cash flows from the original purchase assumptions are evaluated quarterly and are accounted for on the prospective basis.
- (7) Investments in common stocks of subsidiaries, controlled and affiliated entities are carried at the Company's share of underlying GAAP equity.
- (8) The Company has ownership interests in limited partnerships, joint ventures, or limited liability entities. The Company carries these interests based upon their proportionate share of the underlying GAAP equity of the investment.
- (9) Derivative instruments are accounted for at fair value. The changes in the fair market value of the derivative instruments are recorded as unrealized gains or unrealized losses until termination.

Accounting Changes

Principles Based Bond Definition Project

Effective January 2025, the NAIC Statutory Accounting Principles Working Group adopted reporting changes under the Principles Based Bond Definition project. The reporting changes required review of the Company's bond portfolio to determine whether or not each security meets the new principles-based definition of a bond under SSAP 26. The review of the bond portfolio included evaluation of the economic substance of each security relative to the revised guidance in SSAP 26 Bonds, SSAP 43 Asset-backed Securities, and SSAP 21 Other Admitted Assets. The impact of these changes is outlined in Note 21 C of this statement.

Net Negative IMR

In August 2023, the NAIC Statutory Accounting Principles Working Group adopted changes that allow companies to admit net negative interest maintenance reserves (IMR) with certain criteria. A company with at least 300% ACL RBC, shall admit net negative IMR as an asset across both general and separate accounts in the amount up to 10% of adjusted capital and surplus of the general account. In addition, an amount equal to the admitted net negative IMR must be included in special surplus from unassigned surplus. A company that admits net negative IMR must include accompanying disclosures. The accounting changes are effective through December 31, 2026 and are nullified as of January 1, 2027.

The Company had \$32,851,889 gross negative IMR of which \$24,320,385 was non-admitted and \$8,531,503 of net negative IMR was presented as an admitted asset in the general account, as of December 31, 2025. There was no negative IMR amount recorded which related to insulated or non-insulated separate accounts.

The adjusted surplus amount used to calculate the 10% limit was \$85,315,033 based on reported surplus as of September 30, 2025, adjusted as prescribed for certain balances.

The Company attests that:

- a. Fixed income investments generating IMR losses comply with the reporting entity's investment and liability management policies.
- b. IMR losses for fixed income related derivatives are all in accordance with prudent and documented risk management procedures, in accordance with a reporting entity's derivative use plans and reflect symmetry with historical treatment in which unrealized derivative gains were reversed to IMR and amortized in lieu of being recognized as realized gains upon derivative termination.
- c. Any deviation to (a) was either because of temporary and transitory timing issue or related to a specific event, such as a reinsurance transaction, that mechanically made the cause of IMR losses not reflective of reinvestment activities.
- d. Asset sales that were generating admitted negative IMR were not completed by liquidity pressures (e.g., to fund significant cash outflows including, but not limited to excess withdrawals and collateral calls).

Corrections of Errors

During 2024, corrections were made to 2022 and 2021 balances resulting in an increase in insurance taxes, licenses and fees of \$610 and \$709 respectively. As a result of this correction \$1,079,424 of state income tax receivables were written off. In accordance with SSAP No. 3 - Accounting Changes and Correction of Errors, these changes are being treated as a correction of an error and presented as an adjustment to unassigned surplus of \$1,080,743 for the period ended December 31, 2024.

- A. Derivatives under SSAP No. 86 - Derivatives
- (1) The Company's derivative instruments are primarily used to hedge a wide range of risks including interest rate risk, equity market risk, and foreign currency exchange rate risk. The Company receives collateral from its derivative counterparties to limit credit risk.
 - (2) The Company limits its net exposure to equity market risk by entering into equity index futures. The Company uses cross currency swaps and currency forwards to hedge currency risk. The Company utilizes interest rate swaps to hedge exposure to interest rate risk. The total carrying value of derivative assets were (\$14,428,188) and \$21,106,192 as of December 31, 2025 and December 31, 2024, respectively.

The Company also enters into the derivatives that do not qualify for hedge accounting under SSAP 86, including currency forwards, cross currency swaps, and equity index future as economic hedges. The ultimate realization of deferred tax assets depends on the generation of future taxable income during the periods in which the temporary differences are deductible and prior to the expiration of capital loss, net operating loss and tax credit carry-forwards. Management considers the scheduled reversal of deferred tax liabilities (including the impact of available carry-back and carry-forward periods), projected taxable income, and tax planning strategies in making this assessment. Management believes it is more likely than not that all deferred tax assets will be realized based on projected taxable income and available tax planning strategies. There were no tax planning strategies used related to reinsurance.

This may result in an increase in mandatory assessments by state guaranty funds, or voluntary payments by solvent insurance companies to cover losses to policyholders of insolvent or rehabilitated companies. Mandatory assessments, which are subject to statutory limits, can be partially recovered through a reduction in future premium taxes in some states. The Company is not able to reasonably estimate the potential impact of any such future assessments or voluntary payments.

The Company may be involved from time to time in judicial, regulatory and arbitration proceedings concerning matters arising in connection with the conduct of its business. The Hanover Insurance Group, Inc. (THG) has agreed to indemnify the Company and Commonwealth Annuity with respect to certain of these matters as provided in the Stock Purchase Agreement. Management believes, based on currently available information, that the results of such proceedings, in the aggregate, will not have a material adverse effect on the Company's financial condition. Given the inherent difficulty of predicting the outcome of the Company's litigation and regulatory matters, particularly in cases or proceedings in which substantial or indeterminate damages or fines are sought, the Company cannot estimate losses, or ranges of losses, for cases or proceedings where there is only a reasonable possibility that a loss may be incurred. However, the Company believes that at the present time there are no pending or threatened lawsuits or regulatory proceedings that are reasonably likely to have a material adverse effect on the Company's consolidated financial position.

In addition, the Company is involved, from time to time, in investigations and proceedings by governmental and self-regulatory agencies, which may include investigations into such matters as revenue sharing, claims payment practices, unclaimed property escheatment practices, and other matters. A number of companies have announced settlements of enforcement actions related to such matters with various regulatory agencies, including the SEC, which has included a range of monetary penalties and restitution. The Company is not currently involved in any such investigations or proceedings, though there can be no assurance that such investigations or proceedings may not arise in the future.

In connection with the process of converting over 500,000 in-force life insurance policies (representing policies for both the Company and Accordia) from systems managed by Athene Holdings Limited to the platform of one of our third party service providers DXC, or the "Conversion," the Company and Accordia expect to incur a variety of litigation-related costs. On June 28, 2018 a subsidiary of Athene and FAFLIC entered into a consent order with the New York State Department of Financial Services, or "NYSDFS," relating to the NYSDFS' market conduct examination findings that related primarily to disruptions in servicing caused by the Conversion. Pursuant to the consent order, Athene paid the NYSDFS a fine of \$15 million and will also take corrective actions and provide remediation to policyholders impacted by the Conversion. The agreements between the Company, Commonwealth Annuity and Athene provide indemnities to Athene, including for fines and penalties resulting from violations of law. Commonwealth Annuity has reimbursed Athene an amount equal to the NYSDFS fine in July, 2018. As of December 31, 2023 the Company no longer holds reserves for costs related to certain aspects of the corrective actions agreed under the consent order.

The Company's ultimate legal and financial responsibility cannot be estimated at this time.

The Company's sister company, Accordia Life and Annuity Company is a defendant in a putative policyholder class action, *Clapp, et al. v. Accordia Life and Annuity Company, et al.*, in the Central District of Illinois. Plaintiffs in *Clapp* filed a Motion for Preliminary Approval of Class Settlement on May 10, 2019, which was granted by the Court on June 7, 2019. The Court granted final approval on June 23, 2020. Although the Company is not a party to that lawsuit, it is a released party pursuant to the terms of the settlement agreement and some FAFLIC policyholders are members of the settlement class.

In connection with a cybersecurity incident on May 29, 2023, related to services provided to several companies by Pension Benefits Information LLC, and its use of MOVEit software ("PBI/MOVEit Incident"), The Global Atlantic Financial Group LLC or some of its affiliates have received a total of five putative class action complaints alleging failure to properly secure and safeguard customers' sensitive information. Four cases originated in United States District Court for the Southern District of New York: Clancy, Michael v. The Global Atlantic Financial Group LLC (1:23-cv-07975) filed September 8, 2023, Guzman, Marcelina v. The Global Atlantic Financial Group LLC (1:23-cv-08150) filed September 14, 2023, and Hendrix, Eudoice v. The Global Atlantic Financial Group LLC (1:23-cv-9868) filed in New York state court September 15, 2023. A fifth case was filed in the United States District Court for the Southern District of Indiana, but subsequently was voluntarily dismissed: Hansa v. Forethought Life Insurance Company, Global Atlantic Insurance Network LLC, and The Global Atlantic Financial Group LLC (1:23-cv-01549) filed August 28, 2023. The Company itself is currently a party only in the Hendrix case. In accordance with the NAIC Purposes and Procedures Manual of the NAIC Investment Analysis Office, bonds rated 6 are carried at the lower of amortized cost or fair value. As of December 31, 2025, the Company had no 6 rated bonds. As of December 31, 2024, the Company held 1 6 rated bond with a carrying value of \$1,237,356.

The market value adjusted annuity is comprised of bonds, in which the fair value is based on external vendor prices. Based on the level of observable activity, these bonds will be measured at either Level 1 or Level 2.

Derivatives

The Company enters into certain OTC derivatives, primarily equity index options to hedge the growth in interests credited for the indexed universal life insurance products. The Company values the OTC options utilizing the Black-Scholes models. The Company also compares the derivative valuations to valuations to validate the model outputs. For OTC derivatives that trade in liquid markets, model inputs can generally be verified and model selection does not involve significant management judgment. Such instruments are typically classified within Level 2 of the fair value hierarchy.

Conversion

The Company previously completed a conversion to a new life insurance administration system. In a limited number of cases, as a result of the conversion, the Company is using estimates for certain policyholder balances recorded in the financial statements. Any variances to the estimates will be recorded in future periods if estimates are revised or no longer utilized.

Note 14 references “remediation to policyholders impacted by the Conversion” as directed by the NYSDFS. In compliance with this directive, one of these remediation options was to allow policyholders to pay current premiums on a go forward basis and any premium in arrears (i.e. premium that had not been billed) would be applied to the policy, to be collected at the time the policy terminates (e.g. surrender or death). The premium that has been applied under this option has been set up as lien against the policy. In accordance with statutory guidance it is being treated as a non-admitted asset.

F. Subprime-Mortgage-Related Risk Exposure

(1) While the Company holds no direct investments in subprime mortgage loans, the Company may have limited exposure to subprime borrowers through direct investments in primarily investment grade subprime residential mortgage-backed securities. Included in the statistics evaluated is the average credit score of the borrower, the loan-to-value ratio, the debt-to-income statistics, and the diversity of all these statistics across the borrower profile. As is true for all securities in the Company's portfolio, the entire mortgage-backed asset portfolio is reviewed for impairments at least quarterly. Additionally, reviews of specific mortgage-backed securities are made on a periodic basis by reviewing both the unrealized gain/loss as well as changes to the underlying statistics. Included in the analysis are current delinquency and default statistics, as well as the current and original levels of subordination on the security.

2. For Traditional Life business, the reserve for substandard risk is shown in Exhibit 5, Miscellaneous Reserves. For the most recently issued business, the reserves for substandard policies are determined by computing the regular mean reserve for the policy and holding and additional one half of the extra premium charge for the year. For one older block of business, factors expressed as a percentage of the substandard premium and supplied by the Actuary of the New York Insurance Department (i.e., Guardian Life factors) are applied to the total substandard premium, by issue year, to determine the reserve for the substandard risk. For another older block, substandard business issued after 1981 have reserves calculated using 175% of the 1958 CSO mortality or the appropriate extra mortality using the 1980 CSO. Risk premium reinsurance liabilities are valued at the corresponding multiple of the standard liability. Substandard annuities are charged a premium based upon a rated age and are reserved by adding a constant number of extra deaths to the standard mortality at every age, so as to produce the life expectancy of the rated age. This method provides additional reserves that grade to standard reserves at the end of the mortality table.
3. The Company had \$1,848,474,771 and \$1,857,196,927 of insurance in force for which the gross premiums were less than the net premiums according to the standard valuation required by the Commonwealth of Massachusetts as of December 31, 2025 and 2024, respectively. Reserves to cover the above shortfall in premiums totaled \$31,937,410 and \$32,153,977 at 2025 and 2024 year- end and are reported in Exhibit 5, Section G.
4. For non-universal life plans and universal life accidental death and waiver of premium, tabular interest, tabular less actual reserve released and tabular costs are calculated by formulas. For universal life, except for accidental death and waiver of premium, tabular interest and tabular cost are equal to actual credits and charges to the policies.
5. Tabular interest on funds not involving life contingencies is calculated by formula, except for the dividend accumulations which is a ledger liability.
6. Details for Other Changes

In accordance with the procedures of Massachusetts, the Company’s domiciliary state for approving items within a separate account, the separate account classification for variable life insurance products, variable annuity contracts, and pension contracts are supported by 175 M.G.L. Sections 132G – 132I.

Notes to the Financial Statements

35. Separate Accounts (Continued)

Variable Separate Accounts and Guaranteed Period Accounts

The Company's individual and group variable annuity contracts and variable life insurance policies are supported by variable separate accounts of a nonguaranteed return nature. The Company's group pension contracts permit accumulation in variable separate accounts, but provide fixed annuities upon annuitization. These separate accounts are comprised of sub-accounts, each of which invest in an investment company that is registered under the Investment Company Act of 1940. The net investment experience of a sub-account is credited directly to the policy owner or certificate owner, and can be positive or negative. The assets and liabilities of the sub-accounts are carried at market.

In addition to variable separate accounts, certain variable annuity contracts also offer guarantee period accounts (a GPA), which provides for the accumulation of interest at a guaranteed interest rate for a stated period (the Guarantee Period). Assets in a GPA are invested by the Company in accordance with the investment restrictions applicable to the General Account. If the investment proceeds of a GPA at the end of the guarantee period are insufficient to cover its stated rate of return, the difference will be remitted by the General account. Transfers or withdrawals from a GPA on any date other than on the day following the expiration of the GPA's Guarantee Period is subject to a market value adjustment, which may be positive or negative; however, in no event will the guaranteed interest rate be less than 3%. If the investment proceeds of a Guarantee Period Account at the end of the guarantee period are insufficient to cover principal and this minimum rate of return, the difference will be remitted by the General Account.

Variable Product Guarantees

The Company's variable annuity products provide certain optional riders that a policy owner could elect at issue for a separate charge. The availability of these riders varies by product, but includes certain enhanced death benefit riders, a minimum enhanced earning rider, and a minimum guaranteed annuity payment benefit rider, and a guarantee lifetime withdrawal rider. Under some products, a separate charge for a rider is made against the annuity contract's accumulated value. Under other products, the rider charge is assessed against separate account assets. If proceeds from the investment options are insufficient to provide the guaranteed benefits, any difference will be funded by the Company's General Account. The reserves for these riders are set forth in Exhibit 5, Miscellaneous Reserves Section G of the Company's general account Annual Statement.

The Company issued variable annuity products that offer an EDB rider for which the charge is assessed as a daily charge against separate account assets. In addition, these products offer a guaranteed lifetime withdrawal rider for which the charge is made through reductions of a variable annuity contract's accumulations units in the sub-accounts. In each case, if proceeds from the separate account are insufficient to provide the guaranteed benefits, any difference will be funded by the Company's General Account. The reserve for these riders is set forth in Exhibit 5, Miscellaneous Reserves Section G of the Company's general account Annual Statement.

(2) Separate account assets legally insulated from the general account claims

In accordance with the products/transactions recorded within the separate account, some assets are considered legally insulated whereas others are not legally insulated from the general account. The legal insulation of the separate account assets prevents such assets from being generally available to satisfy claims resulting from the general account.

Pursuant to Section 175 M.G.L. 132G, that portion of the assets of the separate accounts equal to the reserves and other contract liabilities with respect to the respective separate account are not to be chargeable with liabilities arising out of any other business the Company may conduct.

The Company separate account statement includes legally insulated assets of \$125,215,756 and \$121,401,345 as of December 2025 and 2024, respectively. The assets legally insulated from the general account as of December 31, 2025 are attributed to the following products/transactions:

Product/Transaction	Legally Insulated Assets	Separate Account Assets (Not Legally Insulated)
Variable Annuities	\$ 626,202,749	\$
Variable Life Insurance Products	56,337,774	
Total	\$ 682,540,523	\$

(3) Separate account products that have guarantees backed by the general account

As of December 31, 2025 and 2024, the general account of the Company had a maximum guarantee for separate account liabilities of \$1,523,073 and \$1,533,811, respectively. To compensate the general account for the risk taken, the separate account paid risk charges as follows for the past five years:

B. General Nature and Characteristics of Separate Accounts Business

For individual insurance, the separate accounts held by the Company generally relate to variable annuities or life insurance of a non-guaranteed return nature. The net investment return of the separate account is credited directly to the policyholder and can be positive or negative. The variable annuities generally provide a minimum guaranteed death benefit, the nature of which has varied over time. In 1996, the company began offering a minimum guaranteed death benefit which is adjusted annually to the current account value. The assets and liabilities of these accounts are carried at market, and the business has been included in column 4 of the table below.

In 1997, the Company began offering annuities with market value adjustments. While there are guarantees associated with these annuities, returns above this guaranteed level may be subject to market value adjustments which can be positive or negative. The assets and liabilities of these annuities are carried at market, and the business has been included in column 2 below.

For group insurance, the separate accounts held by the Company relate to group annuity contracts, which fund defined contribution and defined benefit pension plans. The assets and liabilities of these accounts are carried primarily at market value.
