Important notice

Global Atlantic Limited (Delaware) and its subsidiaries ("Global Atlantic" or "The Company") makes no representation or warranty, express or implied, with respect to the fairness, correctness, accuracy, reasonableness or completeness of any of the information contained in this financial supplement. Global Atlantic does not accept any liability whatsoever for any direct, indirect or consequential losses (in contract, tort or otherwise) arising from the use of this financial supplement or its contents or any reliance on the information contained herein.

Certain totals may not sum to the corresponding components due to rounding.

Certain information contained in this financial supplement constitutes "forward-looking statements," which can be identified by the use of forward-looking terminology such as "may," "will," "should," "expect," "anticipate," "project," "estimate," "target," "intend," "continue" or "believe," or the negatives thereof or other variations thereon or comparable terminology. Due to various risks and uncertainties, actual events or results or the actual performance may differ materially from those reflected or contemplated in such forward-looking statements. Past performance is not a guarantee of future results.

This financial supplement does not and shall not constitute an offer to buy or sell, or the solicitation of an offer to buy any securities of Global Atlantic. This financial supplement is not for distribution. THIS FINANCIAL SUPPLEMENT DOES NOT DISCLOSE THE RISKS AND OTHER SIGNIFICANT ISSUES RELATED TO AN INVESTMENT IN THE SECURITIES OF GLOBAL ATLANTIC. INVESTORS SHOULD ENSURE THAT THEY FULLY UNDERSTAND THE TERMS OF THE RELEVANT SECURITIES AND ANY APPLICABLE RISKS PRIOR TO TRANSACTING IN SECURITIES OF GLOBAL ATLANTIC. None of the information contained herein has been filed with the U.S. Securities and Exchange Commission, any securities administrator under any securities laws of any U.S. or non-U.S. jurisdiction or any other U.S. or non-U.S. governmental or self-regulatory authority. No such governmental authority or self-regulatory authority will pass on the merits of the adequacy of the information contained herein. Any representation to the contrary is unlawful.

On January 2, 2024, KKR & Co. Inc. ("KKR") acquired the remaining shares of The Global Atlantic Financial Group LLC that KKR did not already own. Following the acquisition, the Company was re-domesticated from Bermuda to Delaware, and changed its name to Global Atlantic Limited (Delaware).

Credit ratings

This list is provided for informational purposes only. Ratings are not recommendations to buy, sell, or hold securities, and are as of the date last issued only. Each rating may be revised or revoked at any time at the sole discretion of the rating organization. Financial strength ratings apply to the issuing companies and do not apply to any specific product or underlying fund. Each individual insurer is solely responsible for the benefits and obligations of the products it issues.

(1) Primarily includes debt obligations of consolidated sponsored reinsurance sidecar vehicles that are not guaranteed by KKR, Global Atlantic, or its other subsidiary companies.

(2) The Company has designated interest rate swaps to hedge the interest rate risk associated with certain senior notes outstanding.

(3) Includes the impact to accumulated other comprehensive income ("AOCI") on available-for-sale securities that the Company does not expect to realize since the Company intends to hold the securities until recovery. As of December 31, 2025, the impact included \$5.9 billion in unrealized losses.

(4) Effective February 1, 2021, the date of the closing of the KKR acquisition, the AOCI balance was reduced to zero due to the impacts of pushing down purchase accounting entries and establishing a new accounting basis.

(5) Risk-Based Capital, or "RBC", for Commonwealth Annuity and Life Insurance Company, which consolidates all U.S. insurance subsidiaries for RBC.

(6) BSCR ratio as of December 31, 2025, was not yet available as of the date of this report.

Product and operational data

New business volume by origination channel and product

Pension risk transfer	1,062	605	195	138	192	453 %	2,000	996	101 %
Funding agreements	185	3,895	1,073	1,168	600	(69)%	6,321	2,373	166 %

(1) New business volumes in individual markets are referred to as sales. In Company's individual market channel, sales of annuities include all money paid into new and existing contracts. Individual market channel sales of life insurance products are based on commissionable premium and individual market channel sales for preneed life are based on the face amount of insurance. Life insurance product sales do not include the recurring premiums that policyholders may pay over time.

(2) New business volumes from the Company's institutional market channel are based on the assets assumed, net of any ceding commission, and are gross of any retrocessions to investment vehicles that participate in qualifying reinsurance transactions sourced by the Company and to other third party reinsurers.

(3) Block reinsurance transactions may be episodic and volumes may fluctuate. Similarly, certain funding agreements issued are subject to capital markets conditions and volumes may fluctuate. Flow and pension risk transfer new business volumes typically occur throughout the year.

Additional information

Non-GAAP financial measures

In addition to presenting our results in accordance with GAAP, we use certain non-GAAP measures commonly used in our industry in analyzing performance. We believe the use of these non-GAAP measures, together with the relevant GAAP measures, provides a better understanding of our results of operations, financial condition, and the underlying profitability drivers of our business. These measures should be considered supplementary to our results in accordance with GAAP and should not be viewed as a substitute for the GAAP measures. Our definitions of the various non-GAAP measures and other metrics discussed in this information statement may differ from those used by other companies.

The following key operating or non-GAAP measures should not be viewed as substitutes for the most directly comparable financial measures calculated in accordance with GAAP:

Key operating or non-GAAP measure	Comparable GAAP measure
Adjusted operating earnings, net of tax	Net income attributable to Global Atlantic Limited (Delaware) shareholder
Adjusted income tax expense (benefit)	Income tax expense (benefit)
Adjusted ROE	ROE
Adjusted operating ROE	ROE
Adjusted invested assets	Total investments
Adjusted net investment income	Net investment income
Net investment earned rate	Investment yield
Adjusted operating return on assets, net of tax	Return on assets
Components of adjusted operating return on assets, net of tax	Components of return on assets
Adjusted net investment return ratio	Net investment return ratio
Adjusted net cost of insurance ratio	Net cost of insurance ratio
Adjusted general and administrative expense ratio	General and administrative expense ratio
Adjusted interest expense ratio	Interest expense ratio
Adjusted income tax expense ratio	Income tax expense ratio
Adjusted shareholders' equity	Total Global Atlantic Limited (Delaware) shareholders' equity
Adjusted debt-to-adjusted capitalization	Debt-to-capitalization
New business volume	No comparable GAAP measure

Adjusted operating earnings, net of tax

Adjusted operating earnings, net of tax, a commonly used operating measure in the life and annuity insurance industry, is a non-GAAP measure used to evaluate our financial performance by excluding items that tend to be highly variable from period to period, primarily based on market volatility and non-core expenses. These adjustments are reported gross of income tax.

Our adjusted operating earnings, net of tax, is equal to reported net income attributable to Global Atlantic Limited (Delaware) shareholders adjusted to eliminate the impact of items in the categories as described below. Adjusted operating earnings, net of tax includes variable investment income (loss) derived from realized gains and losses from the sale of investments not related to asset/liability matching strategies. Adjusted operating

earnings, net of tax should not be used as a substitute for net income attributable to Global Atlantic Limited (Delaware) shareholders as calculated in accordance with GAAP. We adjust for these items as we believe that these items distort the ability to make a meaningful evaluation of our business:

- Investment gains (losses) which includes realized gains (losses) related to asset/liability matching investment strategies and unrealized investment gains (losses).
- Non-operating changes in policy liabilities and derivatives – primarily consists of adjustments for (1) changes in the fair value of market risk benefits and other policy liabilities measured at fair value and related benefit payments, (2) fees attributable to guaranteed benefits, (3) derivatives used to manage the risks associated with policy liabilities, and (4) losses at contract issuance on payout annuities.
- Transaction, integration, equity-based compensation expenses and acquired intangible amortization — primarily consist of equity-based compensation and expenses incurred in connection with strategic transactions, such as the acquisition of Global Atlantic by KKR, and implementation of new accounting standards.
- Income tax adjustments — calculated by applying the appropriate jurisdiction's tax rate (21% for U.S. operations and our Bermuda entity taxed as U.S. taxpayers and 15% for Bermuda entities not taxed as a U.S. taxpayer) to the adjustments that are subject to income tax. The income tax adjustment for interim periods is calculated using an estimate of the annual adjusted operating tax rate. The adjusted operating tax rate could differ from Global Atlantic's effective tax rate as determined under GAAP.

Adjusted income tax expense

Adjusted income tax expense is equal to income tax expense adjusted for income tax adjustments as described above under “—Adjusted operating earnings, net of tax.” Adjusted income tax expense should not be used as a substitute for income tax expense as calculated in accordance with GAAP. However, we believe the adjustments to income tax expense are useful to gaining an understanding of our results of operations.

Adjusted ROE and adjusted operating ROE

We use adjusted ROE and adjusted operating ROE to evaluate our financial performance by excluding items that tend to be highly variable from period to period based on market volatility and non-core expenses, such as AOCI and accumulated change in fair value of reinsurance balances and related assets. AOCI varies in a manner inconsistent with our underlying profitability drivers, as the majority of such fluctuation is related to the market volatility of the unrealized gains and losses associated with our AFS securities. Accordingly, we believe using measures which exclude the above mentioned items is more effective in analyzing the trends of our operations. Adjusted ROE and adjusted operating ROE should not be used as a substitute for ROE as calculated in accordance with GAAP. However, we believe the adjustments to equity and earnings are useful to gaining an understanding of our results of operations.

Adjusted invested assets

Adjusted invested assets represent the investments that back our policy liabilities as well as surplus assets. Adjusted invested assets is used in the computation of net investment earned rate, which allows us to analyze the performance of our investment portfolio. Adjusted invested assets includes (1) total investments on the consolidated balance sheets with available-for-sale securities at cost or amortized cost, (2) cash, cash equivalents and restricted cash, and (3) accrued investment income. Adjusted invested assets excludes the following items that are included in total investments but do not produce net investment income reflective of ongoing operations: (1) assets associated with funds withheld at interest liabilities related to business exited through reinsurance agreements, (2) embedded derivatives associated with funds withheld at interest receivables, (3) securities sold under repurchase agreements, (4) investment related receivables and payables, (5) redeemable and non-redeemable non-controlling interests in consolidated renewable energy and other partnerships, and (6) net collateral associated with derivative assets and liabilities. We include the underlying investments supporting our assumed funds withheld at interest and modified co-insurance agreements in our adjusted invested assets calculation in order to match the assets with the income received.

Adjusted invested assets should not be used as a substitute for total investments as calculated in accordance with GAAP. However, we believe the adjustments to total investments provide a view of the assets from which we earn investment income.

Adjusted net investment income and net investment earned rate

Adjusted net investment income is calculated as reported net investment income adjusted for renewable energy income (loss), unrealized (gains) losses attributable to equity-method investments, and variable investment income (loss) as described above under “—Adjusted operating earnings, net of tax,” excluding the impact of non-controlling interest. Adjusted net investment income should not be used as a substitute for net investment income. However, we believe adjusted net investment income is significant to gaining an understanding of the overall performance of our portfolio of adjusted invested assets.

Net investment earned rate is computed as adjusted net investment income, as described above, divided by the average adjusted invested assets for the relevant period. Net investment earned rate should not be used as a substitute for investment yield as calculated in accordance with GAAP. However, we believe net investment earned rate is useful to gaining an understanding of the overall performance of our adjusted invested assets.

Adjusted operating return on assets, net of tax

Adjusted operating return on assets, net of tax is equal to adjusted operating earnings, net of tax divided by average adjusted invested assets. Adjusted operating return on assets, net of tax should not be used as a substitute for return on assets, as calculated in accordance with GAAP. However, we believe adjusted operating return on assets, net of tax is useful to gaining an understanding of our results of operations relative to the underlying investment base which generates earnings.

Components of adjusted operating return on assets, net of tax

When analyzing return on assets and adjusted operating return on assets, net of tax, we also consider certain ratios that aggregate to return on assets and adjusted operating return on assets, net of tax, namely: (1) net investment income as a percentage of average total investments and adjusted net investment income as a percentage of average adjusted invested assets, (2) net cost of insurance as a percentage of average total investments and adjusted net cost of insurance as a percentage of average adjusted invested assets (the combination of (1) and (2) is also referred to as the “net underwriting ratio”, or the “adjusted net underwriting ratio”), (3) general, administrative and other expenses as a percentage of average total investments and adjusted general, administrative and other expenses as a percentage of average adjusted invested assets (4) interest expense as a percentage of average total investments and average adjusted invested assets and (5) income-tax expense as a percentage of average total investments and adjusted tax expense as a percentage of adjusted invested assets. Altogether, we refer to the foregoing as the “components of return on assets,” or “the components of adjusted operating return on assets, net of tax.”

The components of adjusted operating return on assets, net of tax, individually or in the aggregate, should not be used as a substitute for the respective or aggregated components of return on assets, as calculated in accordance with GAAP. However, we believe adjustments to the respective or aggregated components of return on assets are useful to gaining an understanding of our results of operations relative to our underlying asset base generating earnings.

The components of adjusted operating return on assets, net of tax, are defined as follows:

Adjusted net investment return ratio

Adjusted net investment return ratio is calculated by dividing adjusted net investment income by average total investments.

Adjusted net cost of insurance and adjusted net cost of insurance ratio

Adjusted net cost of insurance is equal to reported net underwriting income, excluding net investment income, and adjusted for (1) investment gains (losses) other than renewable energy income (loss), unrealized (gains) losses attributable to equity-method investments, and variable investment income (loss), (2) non-operating changes in policy liabilities and derivatives which includes (i) changes in the fair value of market risk benefits and other policy liabilities measured at fair value and related benefit payments, (ii) fees attributable to guaranteed benefits, (iii) derivatives used to manage the risks associated with policy liabilities, and (iv) losses at contract issuance on payout annuities, and (3) transaction, integration and equity-based expenses. These adjustments are reported gross of income tax. Adjusted net cost of insurance ratio is calculated as adjusted net cost of insurance divided by average adjusted invested assets. Net cost of insurance ratio is calculated as net cost of insurance divided by average total investments. Refer to “—Adjusted operating earnings, net of tax” above for additional details regarding the foregoing adjustments.

Adjusted general, administrative and other expenses and adjusted general, administrative and other expense ratio

Adjusted general, administrative and other expense is equal to reported general, administrative and other expense adjusted for certain transaction, integration and equity-based compensation expense, as described above. Adjusted general, administrative and other expense ratio is adjusted general, administrative and other expense divided by average adjusted invested assets.

Adjusted interest expense and adjusted interest expense ratio

Adjusted interest expense is equal to reported interest expense adjusted for impacts of consolidation. Adjusted interest expense ratio is adjusted interest expense divided by average adjusted invested assets.

Adjusted income tax expense ratio

Adjusted income tax expense ratio is adjusted income tax expense, as defined above under “—Adjusted income tax expense and adjusted operating tax rate,” divided by average adjusted invested assets.

Adjusted shareholders’ equity

Adjusted shareholders’ equity calculated as total Global Atlantic Limited (Delaware) shareholders’ equity, as reported, less (1) accumulated other comprehensive income, as reported, (2) accumulated change in fair value of reinsurance balances and related assets, net of income tax offsets, and (3) accumulated unrealized gains (losses) on loans carried at fair value, net of income tax offsets. The change in the fair value of reinsurance balances and related assets represents the change in value of embedded derivatives underlying reinsurance with assumed and ceded modified coinsurance and funds withheld at interest and related trading securities. Adjusted shareholders’ equity should not be used as a substitute for total Global Atlantic Limited (Delaware) shareholders’ equity as calculated in accordance with GAAP. However, we believe the adjustments to shareholders’ equity are useful to gaining an understanding of our overall results of operations and financial condition.

Adjusted debt-to-adjusted capitalization

Adjusted debt-to-adjusted capitalization and debt fair value adjustments is calculated using debt adjusted to exclude 50% of the outstanding principal amount of the subordinated debentures as an equity credit, and an adjustment to both the debt and capitalization numerator and denominator for the cumulative changes in fair value recognized due to the application of hedge accounting and for debt obligations of consolidated special purpose vehicles. We exclude a portion of the outstanding principal amount of the subordinated debentures because their terms result in the subordinated debentures receiving equity credit under certain NRSRO methodologies. Adjusted debt-to-adjusted capitalization should not be used as a substitute for debt-to-capitalization as calculated in accordance with GAAP debt divided by capitalization. However, we believe the adjustments to our debt-to-capitalization are useful to gaining an understanding of our overall financial condition.

New business volume

In our Individual channel, retirement sales of annuities include all money paid into new and existing contracts. Individual channel sales of traditional life products are based on commissionable premium, a commonly used industry sales metric, and individual channel sales for preneed life are based on the face amount of insurance. Traditional life sales do not include the recurring premiums that policyholders may pay over time. We also refer to new business volume originated through the individual channel as “sales.” New business volume from our institutional channel is based on the assets assumed, net of any ceding commission. New business volume should not be used as a substitute for revenue as calculated in accordance with GAAP. However, we believe new business volume statistics are useful to gaining an understanding of our overall results of operations.

Ratios derived from average total investments and average total adjusted invested assets⁽²⁾:									
Adjusted net investment return ratio	3.80 %	3.87 %	3.90 %	3.86 %	3.78 %	0.02 %	3.85 %	3.82 %	0.03 %
Net investment earned rate	4.76 %	4.82 %	4.83 %	4.74 %	4.65 %	0.11 %	4.79 %	4.56 %	0.23 %
Net cost of insurance ratio	(3.64)%	(3.18)%	(3.59)%	(5.89)%	(3.48)%	(0.16)%	(4.04)%	(3.67)%	(0.37)%
Adjusted net cost of insurance ratio	(3.51)%	(3.38)%	(3.40)%	(3.35)%	(3.32)%	(0.19)%	(3.41)%	(3.16)%	(0.25)%
Net underwriting return	0.32 %	0.80 %	0.28 %	(2.12)%	0.33 %	(0.01)%	(0.15)%	0.09 %	(0.24)%
Adjusted net underwriting return ratio	1.25 %	1.44 %	1.43 %	1.39 %	1.33 %	(0.08)%	1.37 %	1.40 %	(0.03)%
General and administrative expenses ratio	(0.33)%	(0.43)%	(0.46)%	(0.41)%	(0.40)%	0.07 %	(0.41)%	(0.46)%	0.05 %
Adjusted general and administrative expenses ratio	(0.33)%	(0.41)%	(0.44)%	(0.44)%	(0.38)%	0.05 %	(0.40)%	(0.43)%	0.03 %
Interest expense ratio	(0.17)%	(0.15)%	(0.15)%	(0.16)%	(0.17)%	— %	(0.16)%	(0.16)%	— %
Adjusted Interest expense ratio	(0.18)%	(0.18)%	(0.19)%	(0.19)%	(0.20)%	0.02 %	(0.18)%	(0.19)%	0.01 %
Adjusted operating income tax expense ratio	(0.14)%	(0.16)%	(0.15)%	(0.14)%	(0.11)%	(0.03)%	(0.15)%	(0.12)%	(0.03)%

(1) Quarterly averages are calculated by averaging the current and immediately preceding quarter; For year-to-date periods, calculated by averaging as of the end of each quarter in the applicable trailing period.

(2) Interim periods are annualized.

Non-GAAP reconciliation: ROE excluding AOCI and Adjusted operating ROE excluding AOCI

Unaudited (\$ in millions, except percentages)

	Three Months Ended					YoY Change	Twelve Months Ended		YoY Change
	12/31/2025	9/30/2025	6/30/2025	3/31/2025	12/31/2024		12/31/2025	12/31/2024	
Net income (loss) attributable to Global Atlantic Limited (Delaware) shareholders	\$ (60)	\$ 1	\$ (120)	\$ (1,024)	\$ (7)	NM	\$ (1,203)	\$ (571)	(111) %
